Skyreach Opens Two New Branches in Sydney

Skyreach, the leading elevating working platform company on Australia's east coast, has enhanced its presence in the Sydney market with two new branches. The new Skyreach locations are in Brookvale and Kemps Creek and both are fully operational.

The Brookvale location is the head office for Skyreach in NSW. This site is well placed to service the central Sydney market as well as the burgeoning northern metropolitan area. At Brookvale there are facilities to hold excellent stock of Skyreach scissor lifts and boom lifts, ready for immediate hire and delivery to customers.

Access is excellent for semi-trailers to drop off and collect access equipment. There is also off street parking for customers. The site features excellent wash down and workshop facilities for product servicing, all of which is under cover.

“We have been in the Sydney market for many years,” said Rod Leech, Managing Director of Skyreach.

“In line with the growing demands of our Sydney and NSW customer base, we believe that the time is right to take a higher profile in Sydney with an expanded access fleet and bigger premises to support the market.”

“We also recognise that the Sydney market is on the cusp of massive growth. We are about to see substantial projects which will place heavy demand on infrastructure, the likes of which has not been seen since the Sydney Olympics.”

The projects include the Birrangaroo development, Holsworthy ADF expansion and Sydney Convention Centre redevelopment at Darling Harbour.

To best support the Sydney customer base specifically and NSW in general, Rod Leech has appointed access industry specialist Malcolm Allan to head up the Skyreach NSW operation. Malcolm has almost 20 years experience in the industry, beginning on the shop floor and working his way through to senior management roles prior to joining Skyreach.

“In my previous positions I always viewed Skyreach with both envy and admiration,” Malcolm said.

“Skyreach is an impressive operation poised to experience exceptional growth in the NSW market. The potential is huge. The strength of Skyreach is that we are able to draw on a massive pool of equipment located in both Brisbane and Melbourne. When needed, we can bring in equipment overnight on our own truck fleet.”

Every unit of equipment in the Skyreach organisation is available to our Sydney customers.
