WET A LINE IN STACER'S NEW RELEASE THE 449 PROLINE ANGLER

Due to popular demand Stacer has released a brand new model in the sought-after Proline Angler Range, the 449! Fishermen rejoice this one is just for you!

After the success of the popular 399 and 429 models the 449 Proline Angler was developed to encompass all the features of larger fishing boats into a compact fishing machine.

Complete with dual battery trays in the front casting platform perfect for running an electric motor and a new live bait tank option for the back deck, the 449 Proline Angler is set to fish estuaries, lakes and rivers.

Built on the Proline Sports Hull the 449 Proline Angler not only provides a smooth and dry ride but superb stability at rest ideal for casting from the front and rear platforms.

The roomy 449 Proline Angler offers increased beam of over 20cm compared to its smaller brothers the 429 & 399.

Wynnum Marine's Dealer Principal Darren Nichols said the 449 Proline Angler had been sought after by customers for a long time and they had received great feedback about the new model.

'This boat is very fishing focussed and with the extra space we were able to rate the new Proline Angler to 4 people and increase the horse power rating to a massive 60hp,' Darren said.

The 449 Proline Angler can be optioned up with a bimini and envelope, bow mount thruster plate, side console, rod holders, transom step and rail and a 70L underfloor fuel tank.

The 449 Proline Angler is available as a Stacer Ready 2 Go package including a boat, motor and trailer complete with a three year limited warranty.
